11 September 2009

Dear John,

This letter is to confirm that TMP are a 3M approved system bollard manufacturer. 3M Diamond Grade DG³ Fluorescent Yellow Reflective Sheeting when applied using this system onto the TMP range of Retroreflective self-righting bollards is warranted for 12 years.

3M Diamond Grade DG³ is a CE marked reflective sheeting. It has been independently assessed following third party Factory Production Control audit and has been granted European Technical Approval (ETA 07/0272). This ETA complies with the requirements of BS EN 12899-1:2007, clause 4.2.

3M DG³ also complies with the requirements of BS 8408:2005 and its visual performance meets the requirements set in BS 8442:2006 clause 14.2 for reflective conspicuity panels for Reflective self-righting bollards.

If I can be of further help, please contact me on 01344 857958.

Yours sincerely,

A handwritten signature in black ink that reads 'Liz Newell-Hart'.

Liz Newell-Hart
Technical and Regulatory Affairs Manager
3M Traffic Safety Systems
