

Declaration of Performance

Evo-Chev Chevron

Traffic Management Products Ltd
TMP Solutions Unit 6, Trident Drive, Wednesbury. WS10 7XB

DoP No: 2020-030
Revision A

BS EN 12767:2019
100-NE-A-R-NS-MD-0
70-NE-A-R-NS-MD-0
50-NE-A-R-NS-MD-0

When tested in accordance with BS EN 12767:2019 the chevron will have an expected performance as follows:

Upon impact by the test vehicle at 100kph, the chevron will yield & bend so the chevron goes from a vertical position to a horizontal position allowing the test vehicle to drive over said chevron. Once the vehicle has passed over, the chevron will return to the vertical position. Negligible damage will be seen on the reflective material after impact.

Result – Pass
