The NonCrete Bio-Polymer Bollard wins at Green Apple Environment Awards

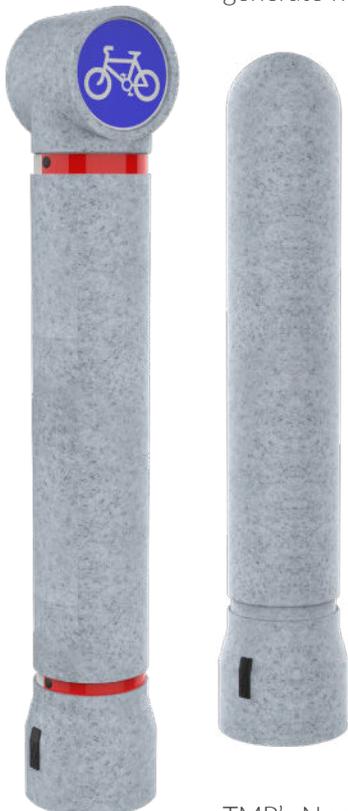

TMP Ltd., the leading traffic management product brand, is pleased to announce that the innovative and eco-friendly NonCrete Bio-Polymer bollard has won the Green Apple Environment Award for Helping the Environment.

The bio-polymer product is made from sugar cane, weighs 3.5kgs, is fully recyclable, and is easily transported, lifted, and fitted into place. Due to the ability of sugar cane to absorb CO₂ as it grows, NonCrete Bio-Polymer bollards generate negative -1.0 kgCO₂e/

kg, compared to their 8.6kgCO₂e/kg concrete counterparts.

TMP works closely with engineers, contractors, and designers to better understand their needs. As a result of working with Milestone Infrastructure, TMP created the NonCrete Bio-Polymer Bollard. This innovation supported Milestone Infrastructure's drive to reduce carbon and its strategy for Safer, Greener Highways. The award has been presented to Hampshire Highways, a partnership between Milestone and Hampshire County Council, for its trial of

TMP's NonCrete Bio-Polymer bollards, replacing concrete versions.

Suzanne Day, Managing Director of TMP, said:

"We are thrilled and proud that TMP's latest initiative with Milestone Infrastructure, eco-friendly Bollard, NonCrete Bio-Polymer, won the Green Apple Environment Award for Helping the Environment. We will continue to evolve and find innovative solutions and environmentally friendly highway products."

Simon Watson, Business Director for Milestone Infrastructure, said:

"We are extremely proud this initiative has won an internationally recognised award. This would not have been possible without the support of Hampshire County Council, which consistently backs our drive for improvement in key areas. We continue working with TMP Solutions on other innovative highways products which will assist us in the drive towards net zero."

About TMP Ltd.

TMP Ltd., part of the Dewhurst Group, is a multi-award-winning brand and an industry pioneer in safety and traffic management products. Based in the West Midlands, TMP manufactures and distributes innovative traffic management products globally.

TMP's core product range includes Passively Safe traffic bollards, fully compliant for on-highway use, versatile street furniture bollards made from a recyclable polymer perfect for cycle routes, car parks and pedestrian areas, and energy-efficient LED traffic sign lights.

TMP continually pushes the boundaries of what is possible in product design and performance testing over and above required standards to ensure we deliver quality products and the best customer experience.

About Dewhurst Group

Dewhurst Group encompasses companies based on four continents and is a global supplier of quality components to the lift, transport, and keypad industries.
